

Protect Yourself from Credit Card Fraud

Recently, con artists from outside the United States have been targeting residents in the Southern Indiana area. These criminals have employed a combination of phony automated telephone calls and fraudulent emails in an attempt to trick residents in the 812 area code into giving out their confidential bank card information.

Therefore, we ask all residents to be on alert for:

- Any phone call claiming to represent your bank, your credit union or credit card company.
- Emails from unfamiliar senders that request credit card numbers, or direct you to automated phone systems.
- Any telephone or electronic communication that asks you to reveal confidential information.

Don't fall for SCAMS!

Protect yourself by **NEVER** giving out confidential information to unknown sources. In the meantime, should you suspect that your personal and/or confidential information has been compromised, please call your local branch immediately.
